

NURULLA IBADOV

Software Engineer | Full-Stack Developer

ibadnurulla@gmail.com | Baku, Azerbaijan | [linkedin.com/in/nurulla-ibadov](https://www.linkedin.com/in/nurulla-ibadov) | github.com/nurulla-ibadov

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience delivering scalable, production-grade web applications across the full stack. Core expertise in React, Next.js, Node.js, Nest.js, TypeScript, and ASP.NET Core, with hands-on experience in cloud infrastructure (Docker, Azure) and CI/CD pipelines. Track record of owning features from architecture through deployment, working in fast-paced cross-functional teams, and writing maintainable code that ships on time. Pursuing a B.Sc. in Information Technology at Azerbaijan Technical University (expected June 2026).

PROFESSIONAL EXPERIENCE

Digital Developer | Qwasar Silicon Valley | Baku, AZ

January 2026 – Present

- Develop and own full-stack web features using TypeScript, React, and REST APIs — from technical design through production deployment.
- Improve digital campaign performance through structured A/B testing and analytics, translating data into actionable product decisions.
- Work in cross-functional agile sprints with product, design, and backend engineers to scope and deliver high-quality features on schedule.
- Metro Hackathon (Baku): Led a 3-person engineering team to design, build, and deploy a real-time transit information platform in 24 hours. Owned full-stack architecture, REST API design, and cloud deployment — project recognised for technical execution and UX quality.

Cyber Security Engineer Intern | Bakcell | Baku, AZ

November 2025 – December 2025

- Conducted network traffic analysis using Wireshark and infrastructure vulnerability assessments using Nmap across production systems; delivered a prioritised risk report to senior engineers.
- Performed SQL injection and OWASP Top 10 security testing on external-facing web applications, documenting exploitable endpoints and recommended mitigations.
- Supported the IT security team in remediating vulnerabilities and updating incident-response runbooks, contributing to faster triage and improved security posture.

Frontend Developer | Vivisolis | Baku, AZ

April 2024 – June 2025

- Delivered 10+ production features in React, Next.js, and Nuxt.js; reduced initial page load time through code-splitting and lazy loading.
- Integrated multiple third-party REST APIs and managed application state with Redux, enabling new product workflows with no regression on existing features.
- Built a shared Tailwind CSS component library adopted across the product, reducing UI inconsistency and cutting onboarding time for new engineers.
- Established a cross-browser QA checklist (Chrome, Firefox, Safari, Edge) that standardised testing and measurably reduced reported visual defects.

Frontend Developer | Jet Academy | Baku, AZ

November 2023 – February 2024

- Built interactive student-facing dashboards in React and Angular featuring real-time data visualisation and fully responsive layouts.
- Extracted and documented a reusable component toolkit adopted across three projects, eliminating duplication and accelerating feature delivery.
- Contributed to code reviews with a consistent focus on accessibility, performance, and coding standards — improving overall merge quality.

TECHNICAL SKILLS

Languages: JavaScript (ES2023+), TypeScript, C#, Java, Python, HTML5, CSS3
Frontend: React, Next.js, Nuxt.js, Angular, Tailwind CSS, Redux
Backend: Node.js, Nest.js, ASP.NET Core, Spring Boot, REST API
Databases: PostgreSQL, MySQL, SQL Server, SQLite, MongoDB
DevOps & Cloud: Docker, Azure, GitHub Actions, CI/CD, Git, Render, Railway, cPanel
Security: Nmap, Wireshark, OWASP Top 10, SQL Injection Testing

EDUCATION

B.Sc. in Information Technology | Azerbaijan Technical University | Baku, AZSeptember 2022 – June 2026

- Relevant coursework: data structures & algorithms, network security, database systems, software engineering, web development.
- Completed internships at IT firms working directly with senior engineers on live production codebases.

High Honor Certificate — Backend Development | Code Academy | Baku, AZSeptember 2023 – January 2024

- Graduated top of cohort. Led a team project to build and deploy a REST API platform with full Git-based CI/CD integration.
- Competed in coding competitions to sharpen algorithmic problem-solving and stay current with backend engineering practices.

CERTIFICATIONS

- Introduction to Full-Stack Development — Qwasar Silicon Valley | November 2025 | upskill.us.qwasar.io
- Introduction to Software Engineering — Qwasar Silicon Valley | December 2025 | upskill.us.qwasar.io

HACKATHONS & COMPETITIONS

- Metro Hackathon, Baku — Team Lead | Led 3-person team to build a real-time Baku Metro transit platform in 24 hours. Handled full-stack architecture, REST API design, and cloud deployment. Recognised for technical execution and user experience quality.
